Retirement Care Program

Daily board of \$33 includes all feed, private stall, daily turnout, grooming, placement of blankets, sheets, boots or other clothing, and administration of long term oral medications and supplements at no additional charge. De-worming, vaccination, dentistry, farrier care, medications and veterinary services are additional at very reasonable rates.

The Equine Clinic at Oakencroft is excited to announce the addition of retirement care to the services we offer at our facility. At our beautiful 150 acre farm we can offer a personalized retirement plan for your beloved equine. Each horse has their own stall in our barn reserved for only long term residents. Our care packages include personalized diets, regular grooming, daily blanket removal, and customized turnout schedules. We realize that not all retired horses are the same; each horse has its own needs as they age. We look forward to working with you to make your horse's next stage of life a wonderful experience. With 2 veterinarians living on the farm you can be assured of careful monitoring and prompt attention to any issues that arise. We believe that de-worming, vaccination, dentistry and farrier care are integral to the quality of a horse's life and must be tailored to the special needs of each retired horse. Our team of veterinarians and care givers will make sure your friend, teammate, and companion will be treated with all the respect and affection they deserve.

We also have space for rehabilitation cases and broodmares. Contact us for rates and details.
